**Allowable Subject Matter**

The following is an Examiner's statement of reasons for the indication of allowable subject matter:

Applicant(s) claimed invention is directed to a method of providing an self-assembling monolayer on a surface, the method comprising the steps of a) providing on the surface both latent reactive groups and a monolayer formed of self-assembling monolayer molecules, and b) activating the latent reactive groups under conditions suitable to either covalently attach the self-assembled monolayer to the surface and /or to form a stable monolayer film on the surface, by initiating polymerization of suitable groups provided by the self-assembling monolayer molecules themselves and /or by forming intermolecular bonds between the self-assembling monolayer molecules.

The crux of the invention lies in the discovery that the above method has achieved an optimal combination of such properties as 1) complete and uniform surface coverage with an ultrathin film, 1) a hydrophilic surface having minimum nonspecific attraction for biomolecules and cells, 3) sufficient stability for use as the surface of an implantable medical surface, 4) broad applicability to various plastic and inorganic sensor and medical device materials, and 5) ease and reproducibility of the coating process while avoiding the problems commonly associated therewith. Such has neither been anticipated by nor made obvious from the prior art. Further, the art of record demonstrates other attempts to provide passivated, biomolecule-compatible synthetic surfaces produced in the art which do not, however, contain the advantages as mentioned and neither avoid the problems commonly associated therewith especially with regard to the claims as submitted.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably, accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Lines 6-9 of page 1 of the specification has been deleted and replaced by the following:

-The present application is a continuation of US patent application filed June 4, 2002 and assigned Serial No. 10/163,012 including the amendment to the Specification filed on August 19, 2002, which is a continuation of US patent application filed July 17, 2001 and assigned Serial No. 09/907,303 now US Patent 6444318, the entire disclosure of which is incorporated herein by reference.-
